

Axis Europe

Axis Europe is a private contractor with 850 staff, 10 offices and a fleets size of 514 vehicles.

It's team of skilled operatives provides 24-hour repair and maintenance services to Axis' multiple housing association and local authority contracts across the UK.

Before working with AES, Taylor Burman, Group Fleet Manager, faced real challenges around driver behaviour, asset tracking, and scheduling. AES provided a integrated solution through Webfleet and FleetCheck, seamlessly connecting their vehicle tracking with our operational scheduling systems. The difference has been remarkable.

Taylor said "Working with AES has been seamless and collaborative. Their team takes a proactive, solution-oriented approach and has built strong relationships with us across all levels. They consistently deliver results, without introducing unnecessary complications - a huge plus in our fast-paced environment."

Since partnering with AES, they've seen measurable improvements. Driver behaviour has significantly improved, helping reduce accidents year-on-year. Scheduling has become more streamlined, boosting efficiency and resource utilisation. Crucially, the visibility of fleet data has empowered Axis Europe to drive ongoing improvements across operations and safety.

Taylor concluded "I would confidently recommend AES Fleet to any organisation looking to improve their fleet performance. Their tailored solutions, deep understanding of fleet challenges, and commitment to delivering results have made them a valued strategic partner to Axis CLC."

The Challenge

- Limited visibility of drivers and vehicles
- Scheduling inefficiencies
- Stronger integration of systems
- Reducing accidents
- Improving safety culture

The Results

- Enhanced visibility
- Improved Driver Behaviour
- Increased operational efficiency
- Fewer accidents

As the Group Fleet Manager for Axis CLC, overseeing Axis Europe PLC and CLC Contractors Limited, we needed a partner who truly understood the complexities of managing a large and dynamic fleet.

AES Fleet has exceeded our expectations on every front.
